All of us tend to be shy or nervous when we are talking to someone we have not met before. The best way to overcome shyness is to remind yourself of the old saying that the person you are talking to <u>puts his pants on one leg at a time</u>. That expression shows that we are all human, so just because you are talking to a professor with four degrees or an astronaut who has been in space does not mean you should be nervous. Always remember this : People you are talking to will enjoy the conversation more if they see you are enjoying it.

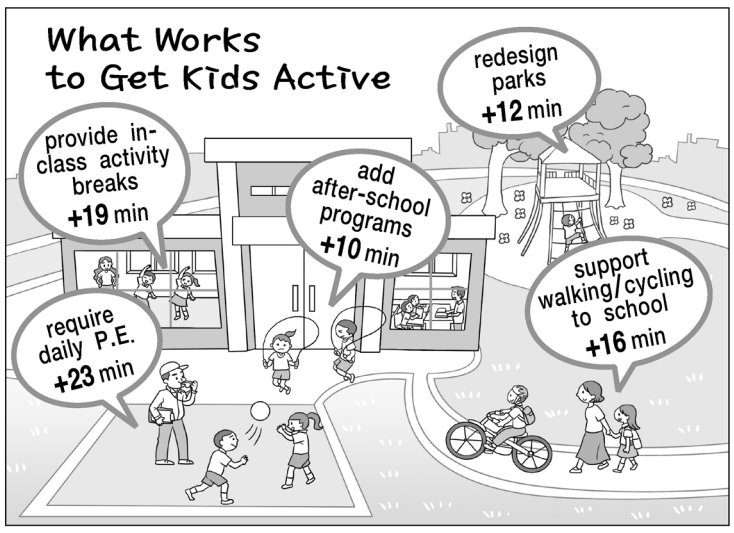
Schools and communities can help students do more of the physical activities they need every day. A recent study examined ways to increase the average minutes students spend on physical activities per school day. Within school settings, the physical activities examined were as follows: daily physical education (P.E.), in-class activity breaks, after-school programs, upgraded playgrounds, and others. Within community settings, active travel to school, park redesign, and others were examined. Interestingly, the distance to parks had a small effect (+1 minute). The following information graph shows the most effective ways to get students active.



① 학교 운동장 개선은 조사 항목에 포함되어 있다.
② 공원까지의 거리는 신체 활동 시간 증가에 큰 영향을 미친다.

When people want a pet, many of them go straight to a pet store. I made that mistake, too. Now, I think it is much better to adopt from a shelter because there are so many animals that have been mistreated, abandoned, or just really need a home. They can be just as cute, amazing, and sweet as the little puppy or cat you find in the pet store. I wish people would give them a chance. I know it is hard sometimes because you do not know their past. But that is just part of the whole journey of exploring who they are, getting to know them, and ultimately loving them.
